Educating for Life!

Students and teachers

Meaningful learning experiences for students engage the whole child as they motivate and inspire a love of learning and the life-long pursuit of knowledge.

Ongoing professional development (PD) for educators is a vital link between current research and classroom practice.

Effective PD enhances program delivery and learning experiences for students.

Literacy, academics and life!

WMS students participate in a wide variety of learning experiences, activities and projects outside of the regular classroom: student leadership and community service activities; chess clubs; monthly visits with local senior citizens; Skills Canada competitions; local and national conferences; track and sporting events; recycling, science and heritage fairs; and much more.

Innovative teaching practices and real-life connections extend student learning far beyond the classroom!

Options abound for grades 6 to 8

WMS's excellent athletics, drama, industrial arts and home economics programs create a variety of career paths for students to explore.

English and French language programs provide students with the opportunity to become bilingual:

- ~ French Immersion (6-8)
- ~ Intensive French (6)
- ~ English language with Core French (6-8)

As Yellowknife's only middle school, this unique setting sets the stage for a smooth transition from elementary to high school.

Outdoor Education

WMS's dynamic outdoor education program connects students with the land, and gives them a deeper appreciation for nature and the outdoors.

These experiences equip students with a practical, and potentially life-saving, skill-set that they'll have for years to come.

All WMS students have the opportunity to develop life-long skills, abilities and knowledge as they experience this unique and exciting program!

École William McDonald Middle School is a great choice ...

- WMS's learning environment recognizes and understands the specific needs of students during the adolescent years
- Students can match their interests, talents and passions to any number of WMS's extra-curricular teams, groups and clubs

- Learning experiences focus on enhancing pride, respect and self-esteem
